### SUMMARY

A passionate and results-driven MERN Stack Engineer with 4 years of professional experience in designing, developing, and optimizing web applications. Adept at crafting scalable solutions with modern technologies, delivering clean, maintainable code, and ensuring seamless user experiences. Eager to leverage technical expertise, problem-solving abilities, and a commitment to innovation in a role that fosters growth and impact.

### SKILLS

- Frontend:** React.js, Typescript, Redux, Redux Toolkit, React Query, Next.js, Javascript, Tailwind CSS, Bootstrap, HTML/CSS, PWA, React Native
- Backend:** Node.js, Express.js, Fastify, MongoDB, Postgres SQL, MySQL, Containers, Microservices, Docker, AWS, Kafka, Redis, Git, Sequelize

### PROFESSIONAL EXPERIENCE

#### Software Engineer

Mar 2022 - Present

##### Digital Myth Solutions

At Digital Myth Solutions, contributed to the development of Eagle IOT, a leading vehicle tracking and fleet management system, utilizing GPS and telematics technologies to deliver real-time monitoring, actionable analytics, and performance insights. Enhanced fleet efficiency, safety, and decision-making, setting industry benchmarks with innovative solutions that continue to drive success in fleet management.

- Developed and maintained full-stack web applications with the MERN stack ensuring seamless integration and performance.
- Collaborating with cross-functional teams to gather and analyze requirements for new features.
- Implemented scalable, responsive UIs with React.js, Redux Toolkit, Material UI, and Tailwind CSS to enhance user experience.
- Built and optimized RESTful APIs with Node.js and Fastify for efficient data exchange and performance.
- Conducted code reviews to ensure best practices, maintain quality, and provide constructive feedback for team improvement.
- Integrated real-time data handling with Kafka and Redis to optimize performance and ensure responsiveness.
- Applied security best practices, including data encryption, authentication, and authorization, to safeguard sensitive information.

#### MERN Stack Developer

Sept 2021 - Mar 2022

##### Efsol Inc

- Designed and delivered tailored software solutions based on client requirements, ensuring scalability, performance, and satisfaction.
- Debugged, tested, and optimized code to resolve issues, enhance functionality, and improve overall system performance.

### PROJECTS

#### Eagle-IoT | React.js, Redux Toolkit, Node.js, Postgres SQL, Fastify, REST API , Microservices

<https://go.eagle-iot.com>

Eagle-IoT is an all-in-one platform for vehicle tracking, video telematics, fleet, and asset management, designed to streamline operations with real-time monitoring and advanced analytics. Built with React.js and Redux for a dynamic frontend, Node.js with Fastify for a high-performance backend, and powered by Redis and Kafka for seamless data processing and communication.

#### AR Home Services | Next.js, Redux Toolkit, Node.js, MYSQL, Fastify, REST API

<https://arhomeservices.com>

The Home Services app offers a wide range of doorstep services, including food delivery, groceries, and household tasks. Built with Next.js and Redux for a dynamic frontend and a robust Node.js backend powered by Fastify, the app ensures seamless accessibility across devices with a React Native mobile experience.

### EDUCATION

#### BS in Computer Science

University Of Sargodha

2017- 2021
