SUMMARY

A passionate and results-driven MERN Stack Engineer with around 3 years of professional experience in designing, developing, and optimizing web applications. Adept at crafting scalable solutions with modern technologies, delivering clean, maintainable code, and ensuring seamless user experiences. Eager to leverage technical expertise, problem-solving abilities, and a commitment to innovation in a role that fosters growth and impact.

SKILLS

- Frontend:** React.js, Typescript, Redux, Redux Toolkit, React Query, Next.js, Javascript, Tailwind CSS, Bootstrap, HTML/CSS, PWA, React Native
- Backend:** Node.js, Express.js, Fastify, MongoDB, Postgres SQL, MySQL, Containers, Microservices, Docker, AWS, Kafka, Redis, Git, Sequelize

PROFESSIONAL EXPERIENCE

Software Engineer

Mar 2022 - Present

Digital Myth Solutions

At Digital Myth Solutions, I contributed to the development of Eagle IOT, a leading vehicle tracking and fleet management system. By leveraging technologies like GPS and telematics, we provided clients with real-time monitoring and actionable analytics, optimizing fleet efficiency and safety. Our innovative solutions continue to set benchmarks in the fleet management industry.

- Working on the frontend and backend development of web applications using the MERN stack.
- Collaborating with cross-functional teams to gather and analyze requirements for new features.
- Implementing and maintaining scalable and responsive user interfaces with React.js, Redux Toolkit, Material UI and tailwind CSS.
- Developing RESTful APIs for efficient communication between the frontend and backend using Node.js and Fastify.
- Conducting code reviews and providing constructive feedback to team members.
- Implemented real-time data handling using Kafka and Redis for optimal performance at Digital Myth Solutions.
- Ensuring security and data protection best practices in application development.

MERN Stack Developer

Sept 2021 - Mar 2022

Efsol Inc

- Designed and delivered customized software solutions tailored to client requirements.
- Debugged and modified code to resolve issues and enhance functionality.

PROJECTS

Eagle-IoT | React.js, Redux Toolkit, Node.js, Postgres SQL, Fastify, REST API , Microservices

<https://go.eagle-iot.com>

Eagle-IoT is an all-in-one platform for vehicle tracking, video telematics, fleet, and asset management, designed to streamline operations with real-time monitoring and advanced analytics. Built with React.js and Redux for a dynamic frontend, Node.js with Fastify for a high-performance backend, and powered by Redis and Kafka for seamless data processing and communication.

AR Home Services | Next.js, Redux Toolkit, Node.js, MYSQL, Fastify, REST API

<https://arhomeservices.com>

The Home Services app offers a wide range of doorstep services, including food delivery, groceries, and household tasks. Built with Next.js and Redux for a dynamic frontend and a robust Node.js backend powered by Fastify, the app ensures seamless accessibility across devices with a React Native mobile experience.

EDUCATION

BS in Computer Science

University Of Sargodha

2017- 2021
